STOCKS BONDS

DENVER, COLO.

February **MARKET LETTER** 1920

THE OUTLOOK

The year 1920 opened with the greatest demand ever known for oil securities, both in eastern financial centers and outlying markets. The strong buying movement is not confined to stocks representing a few of the present new sensational fields, but rather, to those companies who are firmly established in the older districts and extending operations to the newer possible oil-bearing territories. This is attributed to the fact that the investing public is coming to realize the necessity of larger oil production to take care of the greater consumption.

Despite extraordinary drilling efforts last year, production was only increased slightly over 20,000,000 barrels. Production of crude oil in the United States for 1919 was 376,000,000 barrels, against 355,000,000 in 1918. This increase is not enough to supply the demands for refined products in the past twelve months, and means drilling activities will have to be greatly enlarged and expedited in new areas to furnish the necessary production. The combined capacity of refineries has been so increased and the call for crude oil so much greater that it has nearly exhausted the supply of stored crude. This has resulted in competitive bidding for the supply, with strong advances in price of crude oil in the closing months of 1919. This will no doubt mean other substantial increases in the posted price early this year. The extra revenue obtained by present producing companies will enable them to meet the higher cost of new operations and will result in more intensive activity in every section of the world that has oil possibilities. We predict this will be the greatest year the oil industry has ever had.

CHENO OIL

BUY THIS STOCK NOW

The well of the Inland Oil and Refining Company, offsetting Cheno leases in the Alkali Butte field, is steadily showing more gas from the cap rock on top of the Wall Creek sand. This may blow itself in a well without further drilling.

This is the situation that exists for those who buy stock before the Inland well is completed: The production already developed, together with other large offset tracts to test drilling, show assets more than the $300,000 capitalization. A successful completion of the Inland well proves their holdings in the Wall Creek sand and trebles the value of the properties, giving the stock a value equivalent to 40 or 50 cents per share. This will be immediately reflected in the price of stock on the open market.

Stating more plainly: The stock has assets behind it to keep the stock at its present price. A Wall Creek sand well in Alkali Butte should immediately jump the stock to four or five times today's quotation.

YOU HAVE EVERYTHING TO GAIN BY BUYING STOCK TODAY

Our optioned block is being rapidly subscribed. We offer the stock at 10 cents per share cash or 11 cents on the four-payment plan, 25 per cent down and the balance in three equal monthly payments. We reserve the right, under this offering, to return all orders if our block is oversubscribed. We will withdraw the offer and trade in the stock only "at market" when drilling is again started on the Inland well. Wire your reservations to make sure of your stock and send your remittance by next mail.

Select your broker with the same care and judgment that you would use in selecting your banker or physician, and if you want to guard against losses, observe this cardinal principle: Consult your broker before, not after, buying.

"WYOMING"

The opening of spring will see the greatest wildcat drilling this state has ever seen. The hunt for new pools is to be pushed vigorously. The central belt, west of Casper to Riverton, will see the greater activity. Included in this area are the Poison Spider, Pine Mountain, Emigrant Gap, Richards Big Bend, Buck Springs, Upper Muskrat, Wyoming Oil & Coal, Conant Creek, Powder River, Sand Draw, Casper Creek, Shoshoni and Moneta fields, together with several others. All have test wells drilling in them or will be drilled early in the spring. The Pilot Butte Maverick Spring and Alkali Butte proven fields are adjacent to Riverton and give promise of large developments which will extend their proven areas.

The Lander district gives much promise of further heavy oil production, being developed. Farther south the Red Desert, Lost Soldier, Mahoney, Medicine Bow and Big Hollow sections are due for big things. In the extreme northeastern part of the state the new Osage field will receive the greatest attention. Wells are being completed there at depths ranging from 300 to 400 feet and make 10 to 20 barrels each. Many new structures are being prospected in close proximity to the producing Lance Creek and Mule Creek fields. These two fields will be greatly enlarged through the additional large drilling operations now being carried on. Territory adjacent to Thermopolis and the whole of the Big Horn Basin has many new tests ready to start when the weather is more favorable. Latest estimates on new crude oil production in 1919 from the Wyoming fields show almost twice that of the previous year. Reliable estimates place the gain per day for last year at 52,065 barrels, against a gain of only 27,709 barrels for 1918. Added production of the past year comes from 364 completions, of which 75 were dry and 25 developed a gas flow of approximately 386,000,000 cubic feet a day. In 1918 only 258 wells were completed, 65 were failures and 29 gassers. December was the banner month for the past year in the point of new production with 8,600 barrels. July was next with 6,485 barrels per day added.

The price on Wyoming crude has made three advances since the first of November. The last increase was 25 cents per barrel and follows the announcement of the $3.00 price for Mid-Continent Oil. The new price is $2.60 for Elk Basin and Grass Creek Oil, $2.55 for Lance Creek and $2.25 for Salt Creek, Big Muddy, Rock River and Pilot Butte crude. The price of black oil production from Lander and Thermopolis is unchanged.

Much new pipe line facility is being added or planned for several fields. The old four-inch line from Lost Soldier to Fort Steele has been found inadequate and will be increased to a ten-inch line. An extension will also be run to handle the oil from the Ferris field. The New York Oil Company has let a contract to build a gas line from the Iron Creek, Poison Spider and South Casper Creek fields to Casper. A pipe line from Maverick Springs, to reach the railroad either at Riverton or Shoshoni is contemplated. Another line will be built from Alkali Butte when more production is developed. Another is being finished to handle the Mule Creek oil.

Altogether, it looks like the big year for Wyoming. Practically every section of the state is being prospected. The producing fields are being developed systematically. Pipe line facilities are being added, which will assure a ready market for all oil produced and the increase of 33 1-3 per cent in crude oil prices gives the producing companies large extra capital with which to expand.

RED BANK OIL

This is the latest addition to active trading on the Denver market. Although a comparatively old company, its stock has never been offered on the market. A future wide market is promised through connections with large eastern brokerage houses. The capitalization is 1,200,000 shares of 7 per cent preferred stock, par value $100, and 6,000,000 shares of common with a $1.00 par. Of the preferred $778,050 is issued and 4,230,469 of the common.

The officers and directors are:

Homer T. Lamb	President and Treasurer
E. J. Sullivan	Vice-President
F. Julius Fohs	Vice-President
F. DeC. Sulivan	Director
I. D. Moseley	Secretary

The company has large holdings in Oklahoma, Texas, Louisiana and Kansas. These consist of 151 leases totaling 17,631 acres, located as follows: 6,260 acres in 13 counties of Oklahoma; 3,431 acres in eight counties of Texas; 4,914 acres in four parishes of Louisiana, and 3,206 acres in six counties of Kansas. Of these leases 1,010 acres are practically proven by offset wells and 7,854 acres on 16 different structures are being tested by wells on adjoining acres which other companies are drilling.

The present earnings from oil and gas production are approximately $55,000 monthly. Five strings of tools are in constant operation on their proven acreage. This should result in the earnings being increased materially in the future.

The stock is today quoted 70c bid, 76c asked. Order at market.

STANTON OIL

The chief interests in the field activity of this company are centered on the first well being drilled on their 10,000-acre tract in Scurry county, Texas. This well has reached a depth of about 2,250 feet and drilling steadily.

Drilling will be resumed in the next few days on the McClesky 45-acre tract situated 12 miles north of the town of Ranger. This well has been drilled to a depth of 2,100 feet, but owing to bad weather, work was suspended in November.

Two leases in the Homer district, Louisiana, have been added to their already extensive Kentucky and Louisiana properties. Their total holdings now aggregate almost 50,000 acres.

The stock has been fairly steady on the New York Curb in the last month at 62½c to 75c per share. This looks like rock bottom for the stock, and it may show some advance in the near future.

CONGRESSIONAL OIL

Although only about five months old, this company has already completed three wells in Block 88, Burkburnett field, with added production of 4,000 barrels. A 6 per cent quarterly dividend was announced for January, which attracted many investors.

The stock shows large future possibilities, owing to large production already developed and room for 12 more locations on this one lease. Added to this, they have 300 acres in the Iowa Park district, 160 acres in Hardeman county and a very valuable 2½-acre tract in the Desdemona field. Late announcements also state that 11 tracts in the Bull-Bayou and Homer fields, Louisiana, have just been added.

The stock is being placed and recommended highly by several eastern brokerage houses. It is capitalized for $2,000,000, with a par value of 10 cents per share. We will receive orders on this stock at 10c per share. Orders are taken subject to our confirmation, as the price may be raised at any time.

I X L OIL & REFINING CO.

The well of the Phoe-Tex Company, in which this company holds an interest, is reported down over 1,000 feet. They also have an interest in producing wells in the Burkburnett townsite pool, together with scattered acreage in other parts of Texas and Louisiana. We offer the stock, subject to confirmation, at 1½c per share cash, or 1¾c on our monthly payment plan.

CUSHING-GARBER

The management announces that the tools lost in their No. 1 well have been holding them up on a completion for several weeks. This trouble has been disposed of, and we should hear some very favorable news from this well in the near future. It was claimed the well was making a good showing of oil when trouble caused a suspension of operations. They are going to commence Well No. 2 on the Yale-Quay lease soon. This lease is about 500 feet from the Fair well, which came in a 500-barrel producer recently. Subject to the changing market conditions, we offer Cushing-Garber at 4c cash or 4½c on our monthly payment plan.

CAPITOL PETROLEUM

The Capitol Petroleum Company announces deals for several large properties in Texas, subject to examination and passing of titles, as follows:

Ten acres in the Iowa Park field, located two miles due east of the Kemp-Munger-Allen well, one of the late Texas sensations. This acreage is in the shallow producing area which furnishes wells from the 750-foot sand, good for 20 to 40 barrels.

Market knowledge constitutes the difference between profit and loss in your investments—trade only through brokers whose past record show knowledge of the market.

One thousand and ninety-five acres in the Normangee field near the town of Normangee, Leon county, Texas.

Seventy-five acres in McCullough county, near the shallow well district. Numerous small pumpers have been completed in the 210-foot sand, producing 15 to 20 barrels of 42.5 gravity oil.

Two thousand acres in Parker county south of the Ranger district on the Pennsylvania formation. The Sun Company and Sinclair are drilling in the same locality.

Thirty thousand acres in Terry county. This is wildcat acreage, but has been favorably reported upon.

News of these additions in Texas strengthened the price considerably. Propositions have been made the company to build a refinery near their Mexican well. No action has been taken on this matter. The well in northern Texas is progressing nicely. A 1 per cent dividend has been declared, to be paid to stockholders of record Feb. 15, 1920. Trading in the stock has been very erratic, with a downward movement mostly. The stock is now quoted 19@22c. Subject to the changing market and our final confirmation, we offer Capitol Petroleum at 22c cash or 25c on our monthly payment plan.

UNIVERSAL PETROLEUM

Now in process of organization with authorized capital of $10,000,000; par value $1.00 each. Home office, Tulsa, Okla., with 14 branch offices in the leading cities of the country. This company is a merger of the following companies: Bliss Oil & Refining Corporation, Crystal White Refining Company, Universal Petroleum Company, Universal Lubricating Company, Hazel Oil Company, David Oil Company, Creta Oil Company, Conejos-Mullen Leases (50 per cent interest), Young's Lake Leases (50 per cent interest), Crystal White Refining Burkburnett Leases (75 per cent interest). The Universal Petroleum Corporation is assured of an income of $50,000 a month earnings by the merger companies alone, and with additional capital procured from the present offering of stock, it will be able to develop vast acreage of leaseholds that are unusually promising and will add greatly to its revenues. It presents in an unusual degree a perfect cycle of oil development from the starting of the drill to the finished by-products, mining, refining, marketing and financing all under one management. It has tank lines and distributing plants and gasoline selling stations in the larger cities where it has been operating, which will be increased. The company is most fortunate in its amalgamation in retaining the men who have made successes of the individual companies named and joined forces with others who are in direct management of its affairs, and have scored handsomely in their past undertakings. Prior to final organization, this stock is offered at 85c per share, and we recommend purchase at this price.

OCEAN OIL

The No. 2 well is down 3,325 feet and expected in any day. Pay sand is found on this tract between 3,400 and 3,500 feet. The No. 1 well was completed a 5,000-barrel well and is still making upwards of 2,000 barrels per day. It is rumored this company will pay another large dividend immediately after Well No. 2 is brought in. We advise purchase of the stock. Market is quoted $1.40@1.50. Subject to confirmation, we will sell stock at $1.50 per share.

"USE YOUR BRAINS"

When an investment in oil is offered you use your brains to settle the matter. It is your money that is being invested, so why let someone else decide for you? Investigate the offer carefully; decide whether the management is progressing along the proper lines; see that the capitalization is not too large for its holdings; get your broker to explain these things to you. If you are fully satisfied that the proposition is honest and legitimate—then invest.

No other business in the world offers such unlimited opportunities for the accumulation of wealth. None has so continuously returned enormous profits to investors, or distributed among its supporters so many great fortunes. No other securities offer the same wonderful possibilities for the discerning investor. In other words, oil is the most profitable and essential business in the world today.

OUT WEST

Following is a report recently put out by this company on developments:

"Rig rebuilding is now under way at the Teapot Syndicate-Out West well on Section 22, Salt Creek, the rig builders having started their work last week. Several truckloads of material have already been delivered on the grounds; additional material, including tools destroyed by fire, is being hauled daily. No time will be lost after the rig is completed in stringing the tools and resuming drilling operations. As there is only some 800 or 900 feet of work to complete the hole—now 2,270 feet—to the second Wall Creek oil sand, this should take but a few weeks.

"Reports from the field are that Frantz Oil Corporation, drilling on Section 9, expect to bring in their well the present week, making the second producer on this section, situated to the north and west of the Out West hole. Royalty & Producers, on the southeast quarter of Section 16, cornering the Out West operation on Section 22, are reported drilling, with a good hole at below 600 feet. Eureka-Wyoming is getting busy on Section 17, where they have established camp and erected a rig.

"Out West will shortly commence hauling material to its new lease on Sections 17 and 8, in the withdrawal area of the main Salt Creek pool.

"In the famous Rock Creek field, Western Plains Oil, drilling for Out West on Sections 36-19-78, has started hauling material onto the ground, having purchased rig material at Bosler, Wyo. President Oscar Waechter of the Rock Creek Producers and our field superintendent have already staked the location for the well. Camp will at once be established, the rig built and arrangements perfected for immediate drilling operations. This location is considered to be squarely on the main axis of the anticline adjoining Ohio on the south, and to the south of us is the scene of the operations of Utah Oil & Refining—the Midwest of Utah."

The stock is quoted on this market at 5c bid, 7c asked. Subject to the changing market and our final confirmation, we offer Out West at 5½c cash or 6½c on our monthly payment plan.

PRESTON OIL

Incorporated under the laws of Wyoming for $100,000; par value, 1 cent. The officers and directors are:

W. J. Lloyd	President
L. Lilly	Vice-President
Leo P. Floyd	Secretary-Treasurer
Martin Mullolly	Director
R. A. Sullivan	Director

They have organized to develop an 80-acre lease in the Beggs field, Oklahoma. The lease is situated about two miles southeast of the town of Preston. The Lane Syndicate and the Keoughan-Hurst Company are drilling adjoining property. The Black Tail and Cow Gulch Oil Companies hold interests with them in this property. We offer the stock at 4c per share, subject.

PRODUCTION OIL & GAS

This company was lately organized in Denver. The holdings of the company consist of 3,200 acres in Sweetwater county, Wyoming, and 480 acres in Montgomery county, Kansas, three miles from Cherryvale, upon which there are three wells producing; 66½ acres in Oklahoma which has shallow production. The company's present earning power is about $8,000 per month. The stock is selling at 15c per share, at which price we will execute your order.

APEX REFINING & DRILLING

The annual report of this company shows an average sale of gasoline and oils from their filling stations of approximately $18,000 per month. They have a refinery located at Loomis, Colo., near Boulder. It owns and operates the Steel cracking process. Leases totaling about 2,000 acres in the Big Hollow field are controlled by them. A merger of this company with several others is expected in the near future. The stock is quoted at 5½c bid, 6½c asked. Orders executed at market.

KINNEY

At the annual meeting of the company in Cheyenne, Joe C. Kinney was elected president; Chas. E. Orchard, vice-president; H. F. Severns, secretary; Leslie Miller, treasurer; Joseph Kinney, Leslie Miller, Charles Orchard, Guy Craig and John D. Clark are the directors.

The company owns partial or entire interests in approximately 30,000 acres in Wyoming, Kansas, Oklahoma, Texas, Louisiana and Kentucky.

In the Big Muddy field they have a half interest in 360 acres being operated by the Ohio Oil Company. This has seven or eight wells completed on it to the Wall Creek sand and about 15 wells to the shallow Shannon sand. In addition to this 360 acres, the company controls 2,100 acres in other parts of the field. They have a royalty and lease interest in 160 acres in Grass Creek, with 10 or more wells completed. Also 440 acres in the Pilot Butte field, with three or four wells completed. Kansas acreage in Greenwood county aggregate 300 acres with production and 8,000 acres undeveloped. Other holdings are

HAVE YOUR ORDERS READ "AT MARKET"

Much inconvenience and delay is often caused by our clients taking the quoted price in our Market Letter comments as the standing price for this stock. These quotations are only the price at which the stocks are being traded in on the day our letter goes to press, except in such cases where we place a stated price at which we will sell to you. Prices on all active stocks usually vary from day to day, sometimes going lower and sometimes higher.

We often receive orders to buy so many shares at a certain price. These usually reach us several days after the person remitting has seen the market quotations. If the stock is selling at a higher price we are unable to execute the order until notifying buyer of the higher market. This delay often makes the stock cost you considerably more than it should if bought when your order was first received. When we ask you to make your orders read "at market," it means we will buy for you as cheaply as possible. Often the stock has receded in price and you get this benefit also. Remember, you will always receive more satisfactory brokerage service if your orders read "at market."

about 10,000 acres in Kentucky, 480 acres in the Rock River field, Wyoming; 200 acres in Stephens county; some property in Cotton county, Oklahoma, and in the Peabody field.

The company is capitalized for $10,00,000; par value, $1; 5,000,000 shares are outstanding; $3,000,000 of this is preferred stock, paying 7 per cent dividends, and the balance is common stock. Stock is quoted 52c bid, 56c asked. Make your orders read at market.

BIG INDIAN

This company, together with the Wyoming Chief, has acquired large holdings in the La Prele structure near Douglas, Wyo. They have proven acreage in the Salt Creek withdrawal upon which approximately 1,000 barrels production have been developed and other tracts in the Poison Spider and Lance Creek fields. This stock is always steady in the market, due to its being held by investors scattered over the entire country. We offer the stock at 54c, subject.

MOUNTAIN & GULF

At a special stockholders' meeting in Cheyenne the stockholders ratified the proposal to increase the capital stock from 1,500,000 to 3,000,000 shares, par value $1.00, and elected as directors R. M. Aitken, L. L. Aitken, A. C. Gardner, T. A. Dines, H. L. Ritter, Ralph Hartzell and Vernon F. Taylor. The news that the conference committee has come to a favorable agreement on the leasing bill has tended to strengthen this stock in the past week. Quoted today $1.15 bid, $1.26 asked. We advise purchase at market.

PRODUCERS & REFINERS

Notices have been sent to stockholders of the Producers & Refiners Corporation calling a special meeting to be held in Cheyenne on Feb. 13 for the purpose of changing the name of the corporation to the Kistler Company, to increase the common capital stock from 1,700,000 shares to 2,700,000 shares and to increase the number of directors from eleven to fifteen. The books of the company closed on Jan. 31.

In referring to the properties acquired when control of the Western Oil Fields Corporation was taken over, the directors of the Producers & Refiners Corporation state that the former company owns 1,068 acres in the Homer, Bull Bayou and Pine Island fields of Louisiana, including a half interest in the Shaw lease of 120 acres; oil and gas leases in undeveloped but promising territory as follows: 4,500 acres in Bexar county, Texas; 400 acres in Bienville parish, Louisiana, and an equal amount in Bossier parish; 46 per cent of the stock of the Rowe Oil Corporation, 33 per cent of the stock of the Claiborne Pipe Line Company and other assets of a value of $400,000 or more. The Rowe Oil Corporation owns 1,765 acres in the Homer field, including its half interest in the Shaw lease; 40 acres in the Pine Island field, with two producing wells; 180 acres in the Bull Bayou field and 784 acres in Bienville parish. In Texas the company owns ten acres in Iowa Park, fifteen acres in Burkburnett, five acres in Shelby county and 4,500 acres in Bexar county. It also owns one-third of the stock of the Claiburne Pipe Line Company and other assets in excess of current liabilities of $400,000.

There is a potential production between 50,000 and 60,000 barrels of oil developed on the Shaw lease. About 4,000 barrels are being marketed. The company has anounced plans to build a pipe line from Homer to some point on the Mississippi opposite Vicksburg, Tenn., and will locate a refinery at that point. The distance is about 94 miles. A tank farm with a 1,000,000 barrel storage capacity will be built near Homer.

The Producers & Refiners Corporation has 14 strings of tools working in the Beggs district, Oklahoma; six are on its own account; six jointly with the Gates Oil Company; one with E. L. Robinson & Co., and one with the New York Oil & Gas Company.

The coming year promises big things for this company. From a comparatively small beginning in 1917, they have added holdings in nearly every field of note in Oklahoma, Louisiana, Wyoming and Texas. The stock is selling $9.75@$10.25. We recommend purchase. Order at market.

E. T. WILLIAMS

This company has completed its first well on the Strawn lease in Stephens county, Texas. It came in with about 700 barrels per day production. This is an 870-acre tract and should treble the earning power of the company in the coming year.

The balance sheet presented to stockholders at the annual meeting shows production totals for th last year were 344,612 barrels, which brought the company $524,612. Dividends paid the past year aggregate $210,750. Company assets at the close of the year were estimated at $2,645,075. The company has $315,000 invested in stocks of affiliated companies.

On the other side of the ledger is working capital of $536,-800; surplus of $26,886; accounts payable, $3,428; bills payable, $25,000, and reserve, $56,546.

The next dividend is announced to be paid February 20th to stockholders of record February 1st. This is the customary 4 per cent paid quarterly. We recommend E. T. Williams stock for purchase. It is today quoted $1.78 bid, $1.83 asked. We advise purchase at market.

AMALGAMATED ROYALTY OIL CORPORATION

W. D. Waltman, president of the Amalgamated Royalty Oil Company, has been otified that the Simms Petroleum Company has just completed a 15,000-barrel producer on a 40-acre tract on Section 29-21-7 in the Homer field of Louisiana, on which the Amalgamated Company holds a one-sixteenth royalty interest. This well is the first completion on the lease. Five other wells are reported as being on top of the sand waiting for the improvement of the pipe line situation. If permitted to flow at full capacity, this well will give the Amalgamated Royalty Corporation a revenue of $2,800 a day. The Simms Company is just about to complete an 8-inch pipe line to Minden, 14 miles from the Homer field, and should be able to move a considerable amount of the oil from this lease.

The quotations on Amalgamated Royalty are 85c bid, $1.10 asked. Order at market.

HUTTON LAKE

The well drilled by this company in the Rock River field, Wyoming, has reached a depth of 3,415 feet. The oil sands are expected around 3,600 feet. Stock is quoted 2½c bid, 3½c asked. We offer the stock, subject to prior sale, at the asked price.

TEXAS PETROLEUM

We were instrumental in placing this stock before the public and sold it at the $1.00 price, for which all treasury stock was sold. Since becoming an active trader on the open market the bid price has receded considerably. This cannot be attributed to any adverse news regarding their properties or developments, as the company has shown a very aggressive policy and is progressing nicely.

The first well is started in Section 3-12-12 in the Bull Bayou field of Louisiana. This is a splendid location, being surrounded by producing wells on every side. The timber are being moved on the lease to commence No. 2. We advise all our clients who purchased this stock at $1.00 to buy an additional amount at the present low market to average down the cost price. We also advise all who did not purchase the first offering to get into this stock at the present market for good future profits. We will soon begin to get favorable news from drilling operations. This should result in a steady rise in the market price. Today's quotations are 50c bid, 60c asked. We offer stock at 60c, subject to our final confirmation.

WIND RIVER

Since this company lost their suit, in which they tried to rescind the contract of purchase on their Lander holdings, claiming it did not produce the amount claimed by the Producers & Refiners and Western Exploration Company, favorable reports on a final settlement between the companies involved have been rumored. This has caused a 100 pr cent advance in the market price of the stock. It had been selling at 3c for some time, but jumped to 8c. Today's quotations, 5c@7c. Subject to the changing market, we offer Wind River at 6c cash or 7c on our monthly payment plan.

JEWEL OIL

Jewel has been a very active trader in the past month. This was due to the announcement that J. I. Carper, treasurer and director, and one of the organizers of the Western Oil Fields Corporation, had acquired approximately one million shares of the stock and was elected president.

The management and plan of the company to refinance and again become active would portend a higher market for the stock. It is today quoted 8¼c@9¼c. Order at market.

CONSOLIDATED ROYALTY

The annual report for the past year of this company shows earnings of $393,807, with expenses of only $9,199. This is a gain of 40 per cent over 1918. Increase of the earnings is due to larger production of oil on properties in which the company has interests and the higher price paid for crude oil. The best properties are in the Salt Creek and Big Muddy fields of Wyoming. These are only 20 per cent developed. There is only a 5 per cent development of its holdings in the North Texas fields. It is certain that the income will be materially increased in the coming year.

At the close of the year there were 3,223,771 shares of the $5,000,000 capital stock outstanding. The financial statement shows cash in banks and due from associated companies, $335,-438, and properties valued at $3,585,301. During the year $244,675 was paid out in dividends and $11,928 in taxes. The dividend rate has been raised from 8 per cent to 10 per cent, payable quarterly. 322,377 shares of treasury stock have been offered present stockholders at par in the proportion of one share of new stock for each ten shares now owned. This right to subscribe expires February 15th.

The stock has shown much strength and we recommend purchase at market. Quoted today $1.56 bid, $1.63 asked. Order at market.

HOMER UNION

The past week has seen a heavy demand from eastern centers for this stock. It sold to a high of $1.75, but has since receded slightly. Nearly every share of this stock sold in the west has been bought up again at 50 to 100 per cent profit and sent east to fill standing orders. The No. 1 well in Section 24-21-8, Homer field, should be down to the sand in the next two weeks. The No. 2 well is progressing nicely. We can offer small blocks of this stock to our clients at $1.50 per share. This is subject to our final confirmation. We advise purchase.

LANCE CREEK ISSUES

Buck Creek, Western States, Cow Gulch, Lance Creek Royalty, Lusk Petroleum and Burke Oil are the main Lance Creek stocks which show much activity. Nearly all these have production or wells are being drilled on their property. We will sell any of these at market.

We will be glad to suggest some means for you to make money out of your holdings if you will send us a list of them. It is not enough simply to buy a good security from a reputable house. Buy only from a house that is constantly on the alert, furnishing you regular reports on the operations of the company involved and demonstrating its readiness to assist you in every way. In other words, deal only with a house which will safeguard your interests after you have invested as well as before.

ELK BASIN CONSOLIDATED PETROLEUM

This is the name finally given to the Elk Basin, Grass Creek and Keoughan-Hurst merger. Of the 300,000 shares outstanding of Keoughan-Hurst, over 292,000 have been deposited for exchange and 10,800 shares out of 11,000 Grass Creek. Permanent stock certificates are now being issued for the interim certificates given for Grass Creek and Keoughan-Hurst.

Important developments on properties held by the company in Rock River tend to increase production. The Ohio Oil Company recently completed a 1,000-barrel well on a quarter section in which they have a royalty interest and also a 15 per cent working interest. There are 17 wells drilling on properties held by the company in this field, many of which are close to the pay sand.

A well recently reported completed in Tillman county, Oklahoma, is near a 44-acre lease originally held by the Keoughan-Hurst Company on the Red River, located just across from the northwest Burkburnett field.

Other negotiations are pending for large acreage in the shallow producing district of Kentucky. The stock of the company is a very consistent trader on theh New York market, and we recommend purchase. Today's quotations, $9.50 bid. $10.00 asked. Order at market.

GATES OIL

Directors of the Gates Oil Company, January 15th, called a special meting of the stockholders of the company to be held in Cheyenne February 21st for the purpose of voting upon a resolution increasing the capital stock of the company from 2,500,000 shares to 5,000,000. There are outstanding about 1,900,000 shares of the original issue, and it is the intention of the directors to offer an equal amount of the increased capitalization to present shareholders at a low figure, probably 10c a share.

At least a part of this stock to be authorized by the shareholders will be used in acquiring additional properties, but none of it will be placed on the market. The company is earning approximately $150,000 a month from its production on the Dicey McIntosh lease in the Beggs field and from a 40-acre lease to the northwest of the town of Beggs. On the McIntosh farm there are nine wells now completed, with No. 10, 11 and 12 drilling. The total production is about 9,500 barrels daily.

The company has an interest with the Producers & Refiners Corporation on a lease in the Homer field, which is to be drilled immediately, and has acquired several important leases also with the Producers and Refiners, in other sections of Louisiana.

The market has touched a high of $2.30 in the past month's trading. It is now quoted $2.05@2.12. We recommend purchase of this stock and will execute orders at market.

LIBERTY BONDS

We will pay you the highest cash market for your Liberty Bonds on the day they are received by us. Don't exchange your bonds for other securities. Sell for cash and buy for cash. You will secure better values.

SERVICE OIL

It was fully expected that the entire remaining block of Service underwritten by prominent brokers in the east and middle west would be sold out before this and the stock listed on Pittsburgh, Philadelphia and El Paso exchanges. There is still a small amount remaining. This will soon be gone, then we should have a very active market on Service.

The well drilling in Section 3-12-10, Bull-Bayou field, is getting under way. Favorable news is expected any day. We still recommend your getting Service before the listing takes place, and will fill your orers, subject, at $1.10 per share.

SAND HILL OIL COMPANY

This is a new offering being made by a prominent Denver brokerage house. It has been organized by a group of bankers and stockmen of Rawlins, Wyo., to operate in the Ferris field. The capitalization is 250,000 shares, with a $1 par. The officers and directors are: J. M. Rumley, I. A. Deline, N. R. Greenfield, R. C. Middlewood, J. K. Hartt, W. W. Daley, Ole Larsen, W. L. McLaine and George Bible. The holdings consist of 960 acres in the Ferris field and a three-sevenths interest in the Blossom Syndicate having 6,500 acres in Lamr and 147 acres in Grayson county, Texas. Their No. 1 well in the Ferris field is drilling below 2,750 feet on Section 35-26N-87W, and the No. 2 at 1,850 feet in Section 9-25N-86W. A well is also drilling on the acreage in Lamar county, Texas. The company has acquired five Standard drilling rigs and two strings of tools, together with trucks, buildings and other equipment to prosecute a drilling campaign in the spring.

We offer a small block of this stock, subject to prior sale and withdrawal without notice, at $2 per share.

INVADER OIL & REFINING (TEXAS)

This company is considering paying dividends starting in March. It is the Texas trustee for the Invader Oil & Refining Company of Oklahoma and divides equally all production, refining and other profits; in ownership of five drilling outfits, more than 20,000 acres of leases in Texas, including Ranger field, where th ecompany has one producing well, and in the Northwest Burkburnett field; also owns Burkburnett refinery, where tankage for storage of 250,000 barrels of oil is being erected, which will be connected with producing leases. It also owns an equal interest in 150 tank cars; in a seven-acre site for refinery at Fort Worth, Texas, and 1,000 acres in the Homer and Bull Bayou fields of Louisiana. The Invader of Oklahoma is recently reported to have purchased ten wells yielding 4,000 barrels daily in Block 84 of the Burkburnett field from the United Producers, paying for it the sum of $1,500,000. It is supposed this will be shared by the Invader of Texas.

The stock has been quite popular with buyers. It has a 10c par and is quoted at 7c bid, 8½c asked. Subject to our confirmation, we will sell stock at 8c per share.

MERRITT OIL CORPORATION

The resignation of Karl C. Schuyler as president was accepted and C. F. Clay, attorney and director of the company, was elected as his successor. The annual meeting is to be held in March. The next regular quarterly dividends of 2½ per cent have been declared payable on February 14th to stockholders of record on January 31st. This company's chief operations are in the Big Muddy field of Wyoming and is an active trader on the New York Curb. It is quoted $21 bid, $23 asked.

BOSTON-WYOMING

Favorable reports on the leasing bill have raised this stock to new high levels in the past 90 days. When the bill becomes a law it will release 800 acres located in the Salt Creek field, Wyoming. The company is now operating on the southwest quarter of Section 2-39N-79W under a permit from the Interior Department, and is taking approximately 35,000 barrels of oil monthly from its wells. Funds from the sale of this oil, except 8 cents per barrel, which is allowed for operating expenses, are held in escrow until the leasing bill is passed. The amount so held is estimated to be over a half million to date. It seems that dividends should be paid to stockholders immediately after this is released. A voting trust is now being formed for this company. All holders of the stock are asked to turn their certificates in and receive for same trust certificates which will be traded in on all markets the same as present original certificates. This company is controlled by the Midwest Oil Company, which in turn is controlled by the Salt Creek Producers' Association. This stock has a very wide market and is very active. Today's quotations are $1.25 bid, $1.37½ asked.

BIG BEAR OIL COMPANY

Leases have been renewed on this company's holdings in the Big Muddy field. They have the first well down nearly 3,250 feet. A lease of 2,200 acres has been added in the Split Hill dome; 160 acres in the Rock Creek field; 160 acres in the Medicine Bow district; 1,280 acres on the Hugo Dome, Lincoln county, Colorado, and a $10,000 interest in the 50-50 Oil Company, which is starting development on a five-acre tract in the Desdemona field, Texas, about March first. The well in Big Muddy has been drilling nearly two years and was given up on account of trouble several times. This should make a test of this property so.no We offer the stock at 4c per share cash or 4½c on the payment plan, subject to our confirmation.

BLACKTAIL

Drilling has been resumed on the well of this company located east of Lance Creek in Section 15-37N-62W. A small showing of oil was encountered in this well around the 1,200-foot mark last fall. The well has been shut down owing to severe winter weather. The oil sand is expected at 2,000 to 2,500 feet. The stock has made some gain from its low price of a couple of months ago. It is quoted at 27c@32c.

ELKHORN

W. S. Kimball, Sr., pioneer druggist of Casper, Wyo., was elected president of the Elkhorn Oil Company, to succeed Mayor John F. Leeper of Casper, who recently died in Chicago. Dr. G. T. Morgan was elected secretary and C. H. Hortsman was the new member named for the board of directors. This company was one of the early pioneers of the Big Muddy field and holds large interests there. The production runs about 400 barrels daily. New interests have lately been acquired in the Texas fields through the Elkhorn Oil Syndicate and an effort will be made to develop additional production. Subject to prior sale, we offer this stock ata 33c per share.

TIME PAYMENTS

For the convenience of our clients, we have arranged to carry installment accounts on a basis of one-third in cash, or approved securities, and the balance in two, three or four equal monthly payments.

In consideration of the slightly advanced price at which time sales are made, there is no interest charge on balance payments, if made promptly when due.

Dividends accruing to stocks purchased on the installment plan will be credited to the purchaser in proportion to equity paid for.

Deliveries will be made upon receipt of final payment, allowing a reasonable time for transfer.

Few people work over ten hours a day. Your money, properly invested, works twenty-four hours every day.
